ADVANCED BIOMECHANICS XXI
COURSE

The Stuff You Have to Know!!!

(30++ years of orthodontic successes and failures with tricks and treats for everyone. All new information.)

Dates: April 12 & April 13, 2019

**Location: Green Bay, Wisconsin
Park-West Pediatric Dental
Dr. Eric Van Miller's office**

**Time: 8:30 AM - 5:30 PM Friday
8:30 AM - 1:00 PM Saturday**

Once again it is time for the illustrious 'CHEESE HEADS' to plan another get together (this marks the 21th year of this annual event). Eric Van Miller has once again offered his facility for our meeting at his office in Green Bay. So make your plans to attend the Advanced Biomechanics XXII Course. For participants of previous 'Biomechanics' courses this program will be a combination of clinical techniques with direct correlation of specific treatment problems through the use of case presentations.

As you know for the past few years I have ask the group to submit ideas for topics for the next year's course. This results in numerous request to answer specific questions regarding specific treatment problems and I have attempted to group these together in order of the most requested items. One popular subject was for tips for treatment of unilareral Class II cases in the mixed and permanent dentition. So we will look at and compare (tx criteria, appliance placement and adjustments and

treatment responses) for various asymmetric Class II techniques. Another common request had to do with extraction cases and more specifically borderline extraction cases (including when to take teeth out and which teeth to take out including treatment criteria for lower incisor extractions and management of congenitally missing teeth in extraction cases). Other questions related to practice technology, finishing and detailing cases, treatment of the vertically sensitive patient, more tips for dealing with relapse cases as well as cases where things didn't work out as planned. Additionally, there was (once again) the request to see more tips and tricks that I have acquired over the last 30+++ years of orthodontics. So this year's seminar will seek to address these items (including answering many of the specific questions that were asked). See the list of 'Clinical Learning Objectives' below.

This will not be a repeat of last year's information.

Multiple cases will be utilized to demonstrate various aspects of mechanics and treatment modalities with particular interest paid to the best available 'evidenced based information'. Additionally, multiple treatment 'pearls' will be shown to make your practice easier and more efficient.

Participants Case Consultations

Participant's individual cases will be reviewed at 5:00PM on Friday and 5:00PM on Saturday after the course. *Please respect the 2 case maximum.* Should you decide to bring the records on a case from your office, be sure that it has been completely traced, analyzed, and treatment planned prior to our discussions. In order to give you an opinion, it is necessary that you present complete and accurate records, and that you follow the "analytical and cephalometric guide-lines" previously set.

Registration Information

Tuition is **\$1000** and includes all supplies, handout materials, break refreshments, and **LUNCH BOTH DAYS**.

As you are aware, these courses tend to fill very quickly. Please take a minute to fill out the course registration below and forward your registration and tuition deposit of \$100 as soon as possible. Registrants will receive confirmation, hotel information, directions to the course site, participant list, and all other course details by mail.

Some of the Clinical Learning Objectives (Lecture Style Course)

- 1) Treatment options and comparisons of fixed and removable (functional) appliances for tx. of asymmetric Class II malocclusions in the permanent and mixed dentition.
- 2) 'Thin Slicing' extraction cases (when, which teeth, and how congenitally missing teeth fit into the mix) and borderline cases.
- 3) Borderline and lower incisor extraction cases (not just for Class III cases) when and why.
- 4) IPR to gain space when, where and how??
- 5) When is it time to take the braces off???
- 6) Learn multiple 'pearls' for practice management of orthodontics in a non speciality practice dealing with patients and parents.
- 7) Dealing with open bite and vertically sensitive cases in the mixed and permanent dentition.
- 8) Periodontal and mucogingival problems including frenectomies.

- 9) Long term retention protocol, results and criteria.
- 10) Current info on WSL and OH considerations.
- 11) Multiple individual topic including: midline correction, phase I tx for blocked out cuspids, different expansion appliances, space maintenance and tips on aligner treatment.

I am sure that you will find this seminar to be an exciting, motivating and provocative experience in the continuation of your orthodontic educational pursuits.

If you have any questions, please don't hesitate to call me at 561-707-7483, or E-mail @ Lowenhaupt@MSN.com.
Best regards to you and your family, and I'll look forward to hearing from you.

Sincerely,

Eric B. Lowenhaupt, D.D.S.
